Dear Sir / Madam,

It has been proposed that several areas of Rawdon should be built on to provide new housing, but I don't think it should be allowed. I have several reasons to support my view point.

Firstly, there will be a large traffic increase that means rush hour will be worse than ever! As a result there will be so many accidents, they will be countless! It also a problem with parking and pollution, which is harmful to people and the environment. (HG2-41)

Furthermore, the animals will lose their habitats. When I take my dog for a walk we see deer, badgers, foxes, squirrels and many more as I walk through the greenbelt .if you destroy greenbelt you will also stopping children playing outside in a large area. (HG12)

In addition, if those houses sell and they have families (with children) where are those children going to learn? Schools are already full, there will not be enough room and if there are houses built everywhere where will the schools be built? Also have you budgeted for building a new school and employed teaching staff?

We would also like to add that I strongly believe you should not go through with this idea because if you do this you can't undo it and Rawdon will never get a good view at the country side again because it will be just houses. (HG12)

In conclusion, instead of building on greenbelt build on brown field sites instead because it is better for the environment and is better to look at than an old factory that no-one will use and will fall down soon anyway.

Please do this immediately because if you don't you can't get fields and greenery back. THEY'LL BE GONE FOREVER!

Yours sincerely [REDACTED]
