Dear Sir / Madam,

I am writing to you as I am utterly devastated to hear that you are proposing to build on beautiful greenbelt areas in Rawdon. Our class have been told that you are planning to build over 400 new houses. Have you seen the amount of brownfield areas available? I strongly feel that this is a tragic option, as there are plenty of houses in Rawdon already. I have other reasons to support my point of view, here are some :

Firstly you would be increasing the amount of traffic (HG2-41) which can cause accidents and further queueing, the A65 is already a nightmare we don't want any more cars on that road. As well as this, adults going to work would have to try to avoid traffic (HG2-41) so they get there on time. This is the same for children going to school.

Another reason for our argument is, the country side views (HG12). Most people bought their houses because of the spectacular view of green fields and farm animals (HG12). If you fill these lovely fields with houses it will spoil the wonderful sight of greenbelt. This wouldn't be as spectacular as before.

If these plans go ahead, we may not be able to cope with a bigger population, for example we would need more doctor surgeries, which we don't have the money for and more schools, where would we get the staff from? We just don't have the space.

We hope you take this information seriously and we're sure we've protested enough to make you change your mind about houses and where you put them.

Yours Sincerely
