PDH01497

Dear Sir / Madam,

Is it true that the rumours about Leeds city council building on a large scale of greenbelt in Rawdon. Are real? If so, we are utterly shocked and rather disgusted about the situation therefore,

We are writing to you because we think you should obey the rules you set and not build on greenbelt! (HG-12 and HG-2-41)

Firstly there will be too many children in the village of Rawdon and are only two local primary school, one secondary school. Secondly-do you really think all the children will fit? Will they have a good education? No I think not. There will be nowhere for people to walk their dogs properly. No woodlands for children to adventure in. No fields for dogs to run around and play fetch.

I urge you not to build the greenbelt (HG-12) land because there are many endangered habitats that will be destroyed e.g. bird nests, mole tunnels and squirrels burrows within the trees. As well as our beautiful greenery views will be destroyed for ever and ever. In addition to that the traffic will be worse and them so called `smart round a bout's. `aren't making the traffic better!

We know we need more house around Leeds but people don't want their greenery to vanish and become brick houses which could be built on brownfield.

Yours sincerely,

[redacted]
