Dear Leeds City Council,

We are writing to you to ask if you would consider **not** building houses on perfectly good greenbelt fields. As they are usually used for dog walking, picnics and animal habitats.

Firstly, this will increase pollution in a large way, because if there's more houses there will be more traffic as a result oil spills spread causing Rawdon, Aireborough and Horsforth to be an unhealthy place to live in. Furthermore killing helpless, humble animals all thanks to horrible pollution. How does that make you feel?

Secondly, deforestation could harm animals as they will have nowhere to live. Also they could get hurt, because when the nature crumbles the animals could be under it all! Therefore some animals like birds and insects actually live in these things your killing. Use your brain before you bring pain (HG3-4).

Next, the fields are a relaxing place, but if you build houses there will be chaos. As a result farmers will lose their jobs all because of this. The cows will be banished from the field. And they will be used as food instead of being beautiful creatures. So please prevent this from happening. (HG2-12 and HG2-41)

Another important reason is that more people will become obese because they will have nowhere to exercise and get fresh air. As they are always cooped up at home watching T.V. But I'm sure you don't want that, do you? Also where will parents take dogs out for walks? And where will you go if our kids want to roll down hills and have FUN.

We hope that our letter has changed your mind and you've reconsidering his plan of destruction

Yours faithfully,

██████████ ██████████ ██████████
