

PDH01505

Dear Leeds City Council

We are writing to you because we strongly disagree about the housing proposal in Aireborough and Rawdon especially because we live there.

Firstly, the housing will prevent people having wonderful views from their bedroom windows. Instead it will be replaced with rows and rows of pointless houses. In addition to this, the countryside relaxes us and if you destroy all of it, we will have no place to express ourselves. Furthermore hundreds of children are privileged to wake up to some of the best views in the county and YOU are going to destroy them! By doing this they will wake up to boring houses with complete strangers in them. (HG-12), (HG2-41)

Next, we are going to talk about the woods that you are going to destroy. Woods hold a lot of opportunities to the public including walking, climbing trees, making dens, cycling and bird watching. By demolishing these woods, people's lives will never be the same. It will make people obese, which we already have a problem with in the UK. Added to having this difficulty, the building work will stop people enjoying them- selves walking their dogs or doing other fun activities.(HG-12)

Another important reason is the animals that live there will die because of no home and less food to live on. If they have nowhere to live there specious will be on decline. Not only that people like to watch wild deer , lapwings ,and bats. If there habitats are destroyed and the animals no longer lives in Rawdon it will be short of stunning wildlife. (HG3-4,HG-12)

One of the biggest problems will be traffic. If we have a bigger population are journeys to basic thigs (such as school and work) will take a lot longer. The roads will get congested and grid locked causing a stand still . More cars means more road which means more accidents and because the traffic the emergency services cannot get their soon enough and by that time it could be to late. Also, the increasing traffic means more pollution and we all hate pollution. Don't we! Moreover if there is more traffic it is practically impossible to cross roads safely and it would cost a lot of money to put up more traffic lights.(HG2-41)

Do you want to have your meat products to raise in price? Well that's what is going to happen if you do all this housing on farmers property. Areas of growing livestock will decrease rapidly and locally sauced food will become scares. Acers and acers of land where you can pick strawberries and blackberries with your family will be lost forever!

And some people will say that these houses will be great for the community .Nonsense! It will destroy innocent animals homes and create horrible things for the public.

We have spent the whole afternoon doing this so please take are opinion into consideration.

Yours sincerely
