

PDHO1507

Dear Leeds City Council,

I am writing to you to make you rethink the idea of building houses all around Leeds. It will destroy everything that you have been working for plus affecting my life and many more. Rawdon is a little but a stunning place for many people to enjoy are spectacular views and are magical walk ways. I could not stand to see are landscape turned to an ugly housing estates. We would lose precious woodlands and fascinating wildlife. I am sure most people would agree that this proposal is a catastrophic mistake. My reasons that this is wrong are as follows.

First of all, congestion. We are already having problems in Horsforth with the new traffic light on the round about increasing the amount of houses (especially on HG2-41) will also increase the amount of pollution that speeds in the air. More cars also means longer travel time of cause this will interfere with daily life. Family time will shorten. Also service vehicles will take longer time to respond to your needs.

Less outdoor space will make more people have obesity because they will be stuck indoors because there's nowhere to go. This makes me feel sad being really sporty myself I would hate to see a child in Rawdon that's not cable of playing sport that's enjoyable for all. Also our pets will become fat due to lack of exercise. Dogs will not be as fun to play with and take for walks.

You could argue that refugees and couples need cheap and practical houses however do you really want to demolish valuable and impressive greenbelt? Instead build on brownfield where structures have already been placed. Litter is already a serious problem throughout the city and I know you try so hard to clear all of it up but this is going ageist it more people more litter. Shops will also increase the amount of rubbish scattered around. In the shop the price of food will rise dramatically because of the food will be further away we can not store foods locally.

Services will been over filling with customers so building more house will have to have more hospital, fire stations and police station which will require more vehicles and we know they will cost you lots of money that could be used for better things.

We hope you will take are letter into account and think of changing your decision and we hope to see a change.
