

PDH01510

Dear Sir or Madam

We are writing to you because we are upset about the countryside being proposed to build and provide housing. It will mean lots of happy memories of going on farmlands and countryside's to be forgotten as there may never be any more memories as the countryside has gone. We have several reasons why to stop this nonsense.

Destroying habitats

First of all, many animals are going to be affected by noise, lights, pollution and litter. There will be less sources of food and not enough habitats therefore animals unfortunately could starve to death and as winter is coming they could freeze and die. Litter is bad as well because if the animals eats this piece of litter it can cause them to have awful pain in there stomach which could kill them. This is a list of all the animals that live in the woodland that could decrease; Wild deer, Bats, Lapwing, sparrow hawks, Tawny owl, Hedgehogs, Foxes and Insects. (HG-3-4) and (HG-12)

Car pollution and traffic

More houses means more cars that also means global warming. There could be hours of waiting in cars which will mean being late for work, appointments that you have paid for and school that will cause lots of late marks and we don't want that, do we? The first thing we think about global warming is Antarctica and all off its precious animals and ice islands. We want to keep Antarctica and if we carry on like this you never know it might melt and all that will be left is water. That means one less continent in the world. Also the road might be too dangerous to cross especially if you have a child, that could also mean no more cycling on the road and that could ruin someone's hobby. (HG2-41)

Farmland

Another problem is that we know that you give the farmers money, you pay them in other words but that can mean less crops and less farm animals. Furthermore if too many farmers in Rawdon loose there animals the money for meat will increase as it comes from further away then it usually does. There will be fewer jobs as men and women who are farmers loose land and don't have enough money to keep it this can mean local food shops in Rawdon will decrease lots in money and we want to stop it! (HG2-1)(HG2-41)

Why you should build it on Brownfield

Whenever I go past Leeds I can see lots of building which have been left, abandoned, Unused and graffiti all over it. NOBODY wants it never in a million years we want it getting rid of. So all the Brownfield in Leeds should become houses so then there will be more countryside that was nearly lost.

Obesity in Leeds

In Leeds we are known because of obesity this is a problem to everyone and we want to change it. But because of all this land that is going no one will be healthier. This is because of walks that people go to and they go to jog, cycle and just a general chat with your friends up the billing or wherever.
