Dear Sir / Madam,

I am writing to you because several areas of greenbelt are going to be built on which we find devastating and urge to protest against your plans. Here are some reasons why we would hate greenbelt to be built on in our Rawdon community.

Our first reason is that YOU are going to destroy greenbelt to squeeze more people into our community. This results in the horrible destruction of local wildlife. This means animals will flee from danger, would you want to be responsible for this crime? In Rawdon we have many different species of animals including the rare and endangered (HG-2) such as the red kite.

Secondly, there will be a severe increase of (HG-2-41) traffic on the roads which is already a large problem in the area. When the roads get blocked you will have to build more roads which will cost a lot of cash. The bus routes will be longer then you will have to create more bus routes. This will be very expensive. An increase number of cars will cause potentially more accidents. The A65 is already very congested.

Our last reason is that more people will be at obesity because they might not be able to afford the gym and there will be no enjoyable walks. None of the dog walkers won't be able to walk their dogs in (HG-2) fields such as the one on Layton lane and next to Airedale. Everyone will now start to complain about not enough space to walk in the fresh air and cramped up in a house.

These are what we think of your plans. All of these are to protest against you. We hope you make the right decision!!

Yours filthy.
