LDF Publication Draft Consultation

Leonardo Building

2 Rossington Street

Leeds LS 8HD

I am responding to the Leeds Site Allocation Plans.

I strongly object to the planned building proposals for the sites

HG2-41 (4240) HG2-43 (5009) HG2-42 (1016)

HG2-12 (4254)

- The proposal to include these Greenbelt Sites in the Local Plan is not consistent with national policy.
- The proposal to use Greenbelt before Brownfield Sites is not justified.
- The proposal to use this Strategic Green Infrastructure goes against the Leeds Core Strategy.
- We bought our home in Horsforth at great expense to us, knowing there were plenty of greenbelt sites around us for our family to grow up and develop in and to enjoy the nature, wild life and the strawberries!
- We pay a high premium to live in Horsforth, would you plan to reduce our charges if these proposals went ahead,

I don't think so

• We chose to live in Horsforth for the wonderful Environment, the proposed plans would mean more schools more Doctors & Dentists etc. The roads in and around Horsforth are already busy enough without the increase the proposed development would bring. The increased number of vehicles on the already extremely busy roads would bring increased dangerous bottlenecks.

• The new houses already being built in Horsforth are not affordable to many people starting out.

They are 4 & five bed roomed houses which will bring more vehicles onto our already busy roads.

Lets save our precious Greenbelt Land and Green Spaces for future generations. Keep Horsforth separate. We do not want to join up with other areas.
