Ruth Atkinson
Acres Hall Farm
Pudsey

11.11.15

I am writing to inform you that site number 1184 in the site allocation plan contains an element of my land and does not belong to the owner of the land that has been put forward for development. The public foot path at the side of the site is in fact my private road and is not the property of anyone else to sell. In addition the land up to and including the stable is owned by the seller however, the boundary you have shown runs on to my land and is not available for development. I explained this to the Leeds City Council representative at the drop in meeting and he informed me that this would be taken out of the plan. However when queried by a resident of Acres Hall they were informed of the following.

The Plan is out to consultation at the current point in time; if representations are received from landowners on part of the site which say that they do not wish for their land to be included we will need to take this into account and consider whether this creates a need to modify the plan before it is submitted to the Government for inspection. A decision on this will not be able to be made until the consultation has closed and all representations have been processed and considered.

Therefore please accept this as my representation to confirm I do not want my land taken in to consideration.

Miss R Atkinson
