Why do you think this site is unsound/sound (delete as appropriate)
 I think the site chosen is reasonable given the ongoing need for housing a fast growing population. My main concerns are in relation to the infrastructure that will need to be in place for a proposed large development such as this. The current road network around Garforth already needs addressing, is at capacity during peak periods and would not be able to cope with the associated pressure of such an increase in commuters. Also in need of addressing would be the increase in demand on local facilities, particularly GP's and schools. Flooding is another issue already exacerbated by a recent new housing development. Finally I think it is a great shame more is not done to protect greenbelt land - it is what is your alternative?

The site could be viable but we should also learn to recycle housing rather than continue on a blinkered path of consumerism.

as a nation something we should be very proud of - as far as I am aware no other nation protects from urban sprawl in such a considered and conservationary way - to inevitable detriment.
